TEK010010 (Automation Test - 5 + Year)

📖 Bachelor of Engineering

Highlights

- To achieve a challenging position in Software Industry in a result-oriented company, where acquired skills and experience will be utilized towards continued growth and advancement.
- Testing Specialist with almost 5 years of comprehensive experience in Software Testing including Onshore/Offshore Coordination, Test Automation, and Business Interactions for requirement gathering, Test Cases design, execution, defect logging and Test status reporting.
- 2.5 years of experience in Banking domain(Finacle) with various modules
- Worked on different modules of banking i.e. Liabilities & Payment.
- Good exposure on Payments, IMPS, G3, Swift modules.
- Almost 1 year of experience in Entertainment domain with time warner group(HBO Channel)
- 6 months of experience in SAP domain with CRM applications.
- 1 year of experience in hospitality domain with Hilton Account.
- Almost 3 years of experience in TOSCA Automation Tool (TOSCA) at each layer
- Intermediate knowledge on Selenium-Java, Rest API/Webservices Automation(Rest Assured).
- Experience in Continuous Integration for projects by integrating Jenkins with TOSCA
- Strong Experience in Automation of Web service using TOSCA
- Basic knowledge on Telecom domain.
- Well knowledge about Designing, Reviewing and Executing Test Cases, Test Planning and Test Estimated as per the client process and using various industry standard test design techniques
- Experience in Functional Testing, Cross Browser Testing, Cross Operating System, Regression, Smoke Testing, System Integration testing (SIT) and User Acceptance testing (UAT)
- Well-knowledge about all the stages of Defect Tracking Life Cycle (DTLC)
- Worked on agile scrum based methods for BDD.
- Implemented BDD through Cucumber.
- Created the Feature Files for Cucumber Automation.
- Created Test Automation Framework with Cucumber and Selenium WebDriver.
- Web Element Inspection through XPath,CSS etc.
- Expertise in creating automation framework design and development,
- test script development and execution using different functional automation tools like Selenium/TOSCA
- Expert Knowledge of automation testing techniques to cover all possible corner cases for
- automation testing, verification, and validation techniques.
- Involved in writing test scripts using BDD-Gherkin and executed it through webdriver I/O.
- Experience of working on agile development model and ALM Tools such as RTC (IBM), Confluence, Jira, Rally etc.
- Strong analytical and problem solving skills
- Ability to deliver multiple workloads to challenging deadlines
- Excellent Interpersonal, Client Interaction and Documentation skills
- Baisc knowledge on SQL & Linux.
- Good exposure on Java, Python and Selenium.
- Good exposure with ADA Testing with Jaws along with AXE Testing.

Skills

Primary Skills

- Testing
- Tosca

Secondary Skills

- Manual Testing
- Selenium

Projects

Project - 1 - IT Industry

Role and Responsibilities :

Automation Test Engineer

- Working on SAP BOCT modules with good exposure on TOSCA automation, wherein looking into automation of complete project application portfolio.
- Desktop based CRM application automation using TOSCA
- Experience in Continuous Integration for projects by integrating Jenkins with TOSCA
- Implementation of Recovery & Cleanup scenarios for application for distributed execution
- Worked on all five modules of TOSCA including REQURIMENTS, MODULES, TEST CASE and Execution.
- Worked on USER MANAGEMENT and TOSCA Designer for Custom Reports
- Good exposure in creation of test Library and business parameter through Tosca
- Handling testing team and providing TOSCA training to Manual & Automation team
- Good exposure on differnet SAP standard modules utilization.
- Automated Test Cases created by testing team in TOSCA.
- Individual contributing in automating applications BOCT with all asian regions countries.
- Implementing Continuous Integration for projects by integrating Jenkins with TOSCA.
- Implementation of Recovery & Cleanup scenarios for application for distributed execution with Test Event
- Participated in the milestone check meetings near the end of each release and provided the inputs/statistics about the automation testing results

Project - 2 - IT Industry

Role and Responsibilities :

Sr. Automation Test Engineer

- Implemented BDD through Cucumber.
- Created the Feature Files for Cucumber Automation.
- Created Test Automation Framework with Cucumber and WebDriver I/O.
- Web Element Inspection through X Path.
- Test execution and reporting through Jenkins.
- Bug Reporting and Tracking through JIRA.
- Presented Automation Test result analysis during daily Agile stand up meetings.
- Responsible for transferring the knowledge about the use of test framework to developers and manual testers.
- Performed ADA testing with Jaws along with AXE testing.
- Get the reports through the Sauce labs and trigger through the rundeck jobs.
- Post the latest project through the Github etc

Project - 3 - IT Industry (12 months)

Role and Responsibilities :

Automation Test Engineer

- Working on DigitalMediaDomain (HBO) with good exposure on TOSCA automation, wherein looking into automation of complete project application portfolio.
- Desktop, Web based and API services automation using TOSCA
- Experience in Continuous Integration for projects by integrating Jenkins with TOSCA
- Implementation of Recovery & Cleanup scenarios for application for distributed execution
- Worked on all five modules of TOSCA including REQURIMENTS, MODULES, TEST CASE and Execution.
- Worked on USER MANAGEMENT and TOSCA Designer for Custom Reports
- Good exposure in creation of test Library and business parameter through Tosca
- Handling testing team and providing TOSCA training to Manual & Automation team
- Individual contributing in automating applications PROMPT, Program asset management UI application and APIs.
- Implementing Continuous Integration for projects by integrating Jenkins with TOSCA
- Implementation of Recovery & Cleanup scenarios for application for distributed execution with Test Event
- Participated in the milestone check meetings near the end of each release and provided the inputs/statistics about the automation testing results

Project - 4 - IT Industry (24 months)

Role and Responsibilities :

Software Test Engineer

- Working on Different version of Finacle application 9.3, 10.1, 10.3 etc.
- Act as a lead to implement test case design of TOSCA in presence of client.
- Creation of test cases using TESTSTEP LIBRARIES.
- Creation and working depth knowledge on TDM (Test Data Management).
- Creation and running test script successfully in execution list.
- Find the successfully executed PDF file
- Successfully done POC on Mobile testing with the help of TOSCA.

Awards

- Got the POB award from client with in short time of joining.
- TOSCA Automation Specialist Level 1 & 2 Certification, TOSCA Test Design Certification, TOSCA Cross browser Certification, TOSCA Web services Certification,
- TOSCA Automation Specialist for API, Tosca Specialist for Exploratory Testing, Tosca Automation Specialist for SAP.
- Android (Java) certified
