

**TEK010042 (Automation Test - 3 + Year)** BTech

## Highlights

---

- Worked as a Software Test Engineer for over 3.4 years in Web application testing.
- Performed Functional, Regression, Integrated systems testing.
- Skilled in manual/automation testing. Strong knowledge of QA testing process.
- Experienced in testing web-based applications and in participating in entire QA life cycle, designing, developing and execution of the entire QA process.
- Worked on banking & Insurance domain project based on Salesforce (CRM), Lawson (ERP), ICM (SAP), Cognos Applications.
- Strong team player
- Learning agility: Quick learner
- I can effortlessly gel with any new team and quickly acquire the competencies required of a new role
- I adore working with excruciating challenges and deciphering them in the pre-defined time frames with the pertinent ability and expertise
- Self-learner with good communication skills
- Goal oriented: results achiever and self-driven
- Work smart and creative
- Good decision-making capabilities
- Focuses quickly on most critical aspects of an issue or problem.

## Skills

### Primary Skills

- Tosca

### Secondary Skills

- Web Testing

### Other Skills

- ALM (Application Life Cycle Management)
- ADO (Azure DevOps)
- Jira
- Eclipse IDE
- Tricentis Tosca
- ARD (Agile Requirement designer)

## Projects

### Project - 1 - IT Industry (24 months)

#### Role and Responsibilities :

- Proven experience of working in an Agile testing environment, ideally with experience of working within a distributed team
- Excellent knowledge in testing skills (Writing test scenarios, cases, executing test cases, opening bugs, verifying bugs)

- Interacted with development and product management teams on review and analysis of functional requirement, resolution of reported bugs and various technical issues
- Clearly gathered, communicated, and reported the test metrics of the product to the key stakeholders via status updates
- Good hands-on experience in ARD design
- Good hands-on other application related to CITI e.g.: Concierge
- Experienced in Executing large no. of scripts on Selenium Grid
- SME of Forgiveness application for US PPP program (Salesforce)
- Demonstrated ability of learning new skills and tackling new challenge
- Manage implementation using standard project management processes and tools
- Created and executed automation test scripts using selenium web driver, java, TestNG, cucumber and maven
- Experienced in Capturing for Page objects
- Feature files, test cases maintenance
- POC for solving Automation Queries in team
- Provided the automation trainings to resources

## **Project - 2 - IT Industry**

### **Role and Responsibilities :**

- Primarily Involved in testing for Lawson (ERP based) application
- Testing the Entire E2E Integration Process from which includes “Salesforce > Lawson > ICM > Cognos”.
- Extensively performed Manual Testing process to ensure the quality of the application.
- Good exposure in Insurance Domain with Policy Creation Processing, commission calculations, and Journal ledger.
- Worked on writing test cases, executing and opening bugs in Azure DevOps.
- Automated integrated test cases for using Tosca
- Maintaining the Tosca suite for Regression areas.
- Supported in transitioning from Manual to Automation strategy using Tosca

### **Awards**

---

- Tosca Automation Specialist 1 and 2
- Tosca Test Design Specialist 1 and 2
- Tosca Data Integrity
