TEK011718 (Development - Front End - 8 + Year)

📖 BTech

Highlights

- Overall, **8.6+ years** of Detail-oriented **Angular development** and 6+ years of experience in developing **Web** and **Client/Server** applications using **Angular 10+/Front-End** technologies **and seeking** to use and enhance proven IT knowledge and grow as an IT professional.

Skills

Primary Skills

- Angular

Secondary Skills

- Java Script

Other Skills

- Angular 14+, Material
- HTML, CSS, Bootstrap
- AWS Cloud
- Microsoft Office Suits
- .Net& C# MySQL
- Rest API Git. SVN
- Typescript, JavaScript

Projects

Software Engineer (20 months)

Working on a US project focused on developing and maintaining an educational academic institution product for Students.

- Working in an **Agile** Environment and Used **Visual Studio and Visual Studio Code** as IDE.
- Developed application Front-End/ User interfaces (UI) using HTML5, Bootstrap 4+, CSS, JavaScript, Angular 12+, Angular CLI, Typescript, Angular UI, and Angular material.
- Used **Git and AZURE** as a version control tool and **MySQL** as a Database
- Identify and troubleshoot front-end issues and bugs, proposing technical solutions, when necessary, via
- **Debugging** and testing using **Google Inspector** development tools, **Terminal errors, etc.**
- Develop responsive web designs using **SAAS and CSS** to ensure optimal viewing across multiple devices.
- Work with backend APIs in **.NET and jQuery** to fetch and display data effectively.
- Work independently and proactively to give and meet tight **deadlines** which I give during the start of spring.
- Must interact with team members and **clients on team calls** to maintain a smooth workflow.
- Worked on backend API modification using**. NET.**

Sr. Software Developer (10 months)

The project focused on developing an online product for users' flight scheduling, flight tracking, maintenance, etc. **Travel Website**/Travel Portal Development and Maintenance. **Online Booking Engine and Reservation Systems. B2C/B2B Mobile Application.**

In addition, the application I worked on included a backend implemented using **.NET Core**, a frontend using Angular 8 and Typescript, and, SQL Server, and Entity Framework.

- Used **Angular 10+** for application development.
- Used **Visual Studio Code** as IDE.
- Developed application Front-End/ User interfaces (UI) using HTML5, Bootstrap 4+, CSS, JavaScript, Angular 10+, Angular CLI, Typescript, Angular UI, and Angular material.
- Created modularized front-end by implementing **Angular Modules, Directives, Components, Data Binding,** and **Services**
- Created **Angular Directives** such as **ngIf, ngFor, ngClass, and ngSwitch** to manipulate **DOM** elements.
- Used **Git**, and **SVN** as a version control tool
- Created site designs.
- **Debugging** and testing using **Google Inspector** development tools and in **Web API using Postman**
- Angular Dependency Injectors such as Scope and, routing.
- Incorporated Bootstrap with **HTML5**.
- Mobile-friendly Responsive Design using **CSS** media queries.
- Cross-browser compatibility testing
- **Payment Gateways Integration** on Controller. **(TABBY, CASHFREE)**
- Responsible for writing C# API for third-party APIs.
- Create custom objects for **API requests and responses**.
- Responsible for testing APIs in P**ostman** and providing documentation to the QA team.
- Being Part of Client Calls and Team Meetings.

Angular FS Developer (16 months)

- Designed CSS, HTML, and jQuery to enhance user interface interactions, manipulate DOMs and respond to events.
- Developed Front End for Supply Chain Web Application, using Angular 8+ and Material components in Typescript
- Created Typescript reusable components and services to consume REST APIs using component-based architecture provided by Angular.
- Hands-on experience in creating Angular modules, controllers, directives, and filters to deploy the entire business logic. Used open-source libraries like Angular material to create customized components.

Angular Developer (24 months)

- Create the visual presentation to the end user, including the HTML 5, JavaScript, and Angular 8+.
- Worked closely with the end users/business analysts to gather the requirements of the project and was responsible for the delivery of technical design documents and implementation
- Worked with JSON as well as XML to consume and produce HTTP requests and Responses.
- Developed Front End for Product Web Application, using Angular 8+ and Material components in Typescript
- Participated in daily meetings to enhance the features of the application participated in code reviews and gave suggestions to other developers.
- Work as a team to meet our Deadline.

Developer (18 months)

- Handling and the entire team responsible for managing the entire account activities, including team management, recruiting and training new hires, supporting, motivating and helping team members to obtain

common business objectives.
- Client relations – issue resolution: Ensuring response to any issues due to bad deliveries, nonperformance, and other service-related issues.
- Responsible for selling staffing solutions to prospective clients in need of technical professionals (entry-level to senior level). Work closely with a team of recruiters, motivate and direct their efforts about client's needs.
