

**TEK012800 (QA tester - 5 + Year)**

■ BCA - Computer Science

## Highlights

---

- Automation Test Engineer with Good Experience, including Experience in manual testing.
- Skilled in test automation frameworks like Selenium and scripting languages such as Java and C#.
- Expertise in designing, developing, and executing automated test scripts, with a strong focus on improving test efficiency, ensuring software quality.
- Optimizing testing processes using tools like Jenkins, JIRA, and Git

## Skills

### Primary Skills

- Automation Testing
- Automation using Selenium

### Secondary Skills

- API Testing
- JIRA

### Other Skills

- Selenium WebDriver
- Java
- Qmetry
- Testng Framework
- Automation Testing Framework
- Git
- Blt Bucket
- BDD Framework Cucumber
- API Testing
- SQL Browserstack Appium
- Playwright
- C#

## Projects

### Project - 1 (21 months)

**Role : QA Automation Engineer****Responsibilities :**

- Design, develop, and maintain automated test scripts for functional, regression, and end-to-end testing.
- Use automation tools such as Selenium for creating robust test cases.
- Run automated test cases for each new release, focusing on critical workflows like product browsing, cart, checkout.
- Track, manage, and report bugs to developers, collaborating closely to ensure swift resolutions.
- Provide detailed and structured test reports to the team, highlighting test coverage and any issues found

## **Project - 2 (14 months)**

**Role : QA Automation Engineer**

### **Responsibilities :**

- Experience of understanding requirement, writing and reviewing test cases for Black Box Testing based on Business requirements.
- Experience in various types of testing like Functional testing, GUI testing, Integration testing, and Regression testing, Exploratory testing, Smoke testing
- Using various tools like SOAPUI, TFS for central repository, Jira, Confluence for project management tool, Android Studio for checking logs etc
- Experience of working on tickets (Production bugs) and prepare QA analysis document for the same.
- Automating some scripts related to other modules of the Project

## **Project - 3 (21 months)**

**Role : Automation Tester**

### **Responsibilities :**

- Worked closely in Automation team and performing testing to ensure if defined functionality is met.
- Involvement in Test Execution, Results Analyzing and Defect Reporting.
- Created Test Cases Using Element locators and Selenium WebDriver methods.
- Prepared test cases, test scenarios and further creating automation scripts.
- Conducting Data driven testing, cross browser testing and parallel test execution. -Enhancing the Test Scripts for Global Execution.
- Involved in Regression Testing using Selenium.
- Preparation of weekly and monthly status reports.
- Frequent status check with all teams to ensure timely automation of defined modules.
