

TEK09569 (RPA Development - 9 + Year)

Highlights

- Having overall 9+ years of experience, working as RPA Manager & Solution Technical Architect in Application development.
- 9+ years of experience in Robotic Process Automation (RPA) using RPA tools.
- 9+ years of experience in business Process Automation using Fusion BPM.
- Responsible for interfacing with stakeholders and getting Architecture Sign off.
- Responsible for troubleshooting and assisting project team(s) in resolving critical technical issues.
- Establish technical frameworks and reusable assets for adoption across engagements.
- Assess automation opportunities from a technical perspective and provide a solution.
- Responsible for creating SOW after assessment.
- Responsible for creating effort estimation of any automation task.
- Responsible for creating a query document based on RFP.
- Responsible for creating POCs for expressing ideas.
- Experienced in building Automation Anywhere Processes and Business Objects for various business systems.
- Expertise in using RPA (Robotics Process Automation) features and worked extensively with Automation Anywhere to create Bots and Automation of repetitive task.
- Extensive experience in Designing, Configuring, Development, Fine-tune & Performance optimization of applications and delivering a variety of complex Web & Windows-based application.
- Extensively worked on debugging application for fixing bugs and Production support.
- Strong skills in software development, testing, designing and communicating Coding considering long-term portability, packaging, maintenance and support.
- Good knowledge of agile methodology.
- Experience to handle multiple projects at the same time and can balance and prioritize multiple tasks.
- Experience in staging and deploying the automation solution into the test and live environments.
- Effort Estimation for Change Requests management.
- Team management and Team coordination on all technical aspects.
- Managing the deliveries on DEV/UAT/Prod environments. Responsible for UAT.
- Coordination with operation team on deployments.
- Overall responsibilities for project deliveries on time and answerable for that.
- Travel to technology partner locations for technical workshops and issue escalation and management.
- Support PR-sale activities and provide technical solutions to stakeholders.
- Evaluate RPA Platforms and provide recommendations.
- Conduct interviews, technology awareness sessions.
- Train project team(s) in adopting reusability and best architectural, design and coding practices.
- Coordinate and participate in structured peer reviews and walkthrough.
- Conduct internal platform training programs.
- Experience of Telecom, Insurance, banking, Health domain for Aetna and CIGNA.

Skills

Primary Skills

- HTML
- JavaScript

Secondary Skills

- Blue Prism
- UiPath

Other Skills

Software Skills:

- RoboticProcess Automation (RPA),
- Automation Anywhere,Blue prism
- UiPath,
- Testing,
- asp.net,
- python,
- SQL,
- MongoDB,
- sap,
- Trello,
- Jira,
- Agile,
- Excel,
- Black belt six-sigma,
- VBScript,
- MS office.
- Oracle,
- MySQL,
- Mongo dB,
- Crm,
- People Soft,
- Trello,
- Share point,
- C, C++,
- ASP.NET,
- (Automation Anywhere11&UI PATH andBlue prism 6.3),
- Python
- ,networking Windows (7,8,10)
- Microsoft azure,
- DynamicCRM,
- Salesforce,
- Jira,
- AI,
- Botcity,
- PMP

RPA Tools:

- AA
- AI,
- PMP,
- SIXSIGMA,BOTCITY,
- UiPath,
- Blue Prism,
- Java

Projects

Project - 1

- Claims pend FCOM when the financial comment indicator displays "View Financial Comment Displays in the claim remark/comments.
- Review Contract comments and processes the claim according to the comments.
- The bot will run periodically and login into the RUMBA application and select a pend code from Claim process screen.

- The bot will perform several actions on the claim and will release the fund to the participant o Member.

Project - 2 - Any Other

- BRGS(Ambulance Claims) captures ambulance claimswhen pricing claims using Burgess

Project - 3

Roles and Responsibilities :

- ?Responsible forinterface with stakeholders andgetArchitecture Signoff .
- Responsible fortroubleshooting andassistproject team(s) in resolving critical technical issues.
- Establishtechnical frameworks andreusable assetsfor adoptionacross engagements.
- Assess automationopportunity from a technical perspective andprovide a solution.
- Responsible for creating Sow after assessment.
- Responsible for creating effort estimation of any automation task.
- Responsible for creating a query documentbasedon RFP.
- Responsible for creating POCsfor expressing ideas.
- Experienced inbuilding Automation Anywhere Processes andBusiness Objectsfor various business systems.
- Expertise inusing RPA (Robotics Process Automation) features andworked extensively with AutomationAnywhere tocreate Bots and Automation of repetitive task.?

Project - 4 (6 months)

Roles and Responsibilities :

- Provide a new solution to meet the annuity processing needs of insurance carriers hit hard by heightened regulatory scrutiny, competition, and shrinking margins.
- Both objectives were met through the provision of a low-cost, fully integrated annuity processing solution with a focus on meeting regulatory and compliance requirements and addressing customer needs
- The introduction of se2 provided an entirely new processing solution to the insurance industry thatrelieves carriers of the processing burden, lowers costs and meets all regulatory compliance needs.)
- KWZ:Provide a new solution tomeetthe annuity processing needs ofinsurance carriers hit hardby heightened regulatory scrutiny, competition, and shrinking margins.
- Responsibilities:-
- Analyzed business requirements,functional specs. Designed,Developed and Executedset of test cases to validate the functionality of the application. Perform User Interface, Integration, System and Regression Testing. Created automation scriptusing Selenium andSelenium Web driver. Worked on Hybrid Framework using Selenium Web Driver. Executed test scripts using Selenium Web Driver. Defect Tracking and Defect Logging using JIRA. Attended daily scrum calls.

Project - 5

Roles and Responsibilities :

- Description: - It is a hospitality-based project. It's a data entry project
- Responsibilities:-
- Design,developanddeploy Robotics Process Automation (RPA) solutions.
- Experience in programming in VB or.Net.
- Expertin developing components those facilities business validations, database/web service interactions.
- Strong problem solving and analytical skill around-
- Configuring bots, object using workflow principles, solving day-to-day technical issues while running

- bots, managing version control and bot log aggregation
- Develop and test cases with strong emphasis on using code to solve technical challenges and shorten the test cycle through automation.
- Estimate test efforts, analyses, communicate test results, and participate in day-to-day QA Activities.
- Company's performance and scalability testing efforts and improve the test frameworks, tools and technologies used by the organization to maintain a high-quality bar.
- This can also include writing specialized testing tools for our software platform.
- Development, Test and Product Management to design and implement test and validation strategies.
- Execute and manage test cases and results; report on test and defect metrics.
- Troubleshoot automated test scenarios across our systems. Contribute to robust, scalable.

Project - 6

Roles and Responsibilities :

- Advance Requests – Any advance payment request is received via email hence a PDF copy of the email is attached to the payment request in SAP as a supporting documentation Adjustments – Any adjustments entries posted on vendor account has to be supported hence necessary approvals & email communication is attached in SAP as a PDF copy.
- The STN (stock Transfer Note) creation for Kandla Port to Kandla Plant; Kandla port to Rajpura plant by road transport Process is operated by SSC –OTC Bunge Mohali team and owned by RKM India Team.
- The team receives the Parcel and Bill of entry information from RKM India team and transporter wise details along with the bill of entry (BENumber) from port Surveyor.
- Once request is received by the SSC team, the person in charge creates the tanker wise dispatch details will include delivery number along with invoice number against each tanker entry and send the invoice PDFs to the port surveyor.
- Team updates the master tracker and process the request based on the request details and then send the updated master tracker to the respective sender ID's.
- Experience in programming in VB or .Net.
- Expert in developing components those facilities business validations

Project - 7

Roles and Responsibilities :

- Digital Marketer Bot has two skills Campaign management and Social media platform management. Campaign means posting an ad – via Google Ad Words or Facebook Ads.
- This bot also keeps track of campaign performance For managing social media platforms, this bot can post articles on platforms like Linked In, Facebook, Twitter etc. – Read comments – Conduct Sentiment Analysis of comments – Track followers, subscribers and generate reports
- **Skills:** Campaign Management, Managing Social Media Platforms
- **Responsibilities:** -
- Experience in programming in VB or .Net.
- Expert in developing components those facilities business validations, database/web service interactions
- Strong problem solving and analytical skill around-
- Configuring bots, object using workflow principles, solving day-to-day technical issues while running bots, managing version control and bot log aggregation.
- Develop and test cases with a strong emphasis on using code to solve technical challenges and shorten the test cycle through automation.
- Estimate test efforts, analyses, communicate test results, and participate in day-to-day QA Activities.
- Add to our company's performance and scalability testing efforts and improve the test frameworks, tools and technologies used by the organization to maintain a high-quality bar.
- This can also include writing specialized testing tools for our software platform. Work with Development, Test and Product Management to design and implement test and validation strategies.

- Execute and manage test cases and results; report on test and defect metrics.
- Create, execute and troubleshoot automated test scenarios across our systems. Contribute to robust, scalable.

Awards

- Program Manager/Master//Advanced Certified with Robotic Process Automation
- Certified with Microsoft DevOps Certification Certified with ASP.NET
- Certified with SIX SIGMA, LEAN, GREEN, BLACKBELT
- Certified with PMP
- Certified with Scrum Master
- Certified with AWS, PYTHON, ARTIFICIAL INTELLIGENCE, BOT CITY
- Received outperforming team award for Program Delivery Project delivery team
- Received certificate of appreciation for efforts and contribution towards implementing automation for Artificial Intelligence Automation RPA Insurance project for Se2 Company
- Certified DM/ PM & Master/Adv. AWS/Azure/AI/Automation/IT
