- My SQL

Other Skills

- **Operating System** : WINDOWS XP / 7
- **Tool** : Mendix modeler 8.14.
- **Web Technology** : Java, JavaScript.
- **Application Servers** : Tomcat 7.0
- **RDBMS** : MySql , Oracle ,SQL Server 2008
- **IDE's** : Eclipse
- **Front End Technology** : HTML5, Koala software, CSS

Projects

Project - 1 (16 months)

Role : Lead Developer

Responsibilities :

Jarvis

- Designing the solutions on Miro board and helping the junior developers in getting them the solutions

DORA :

- Create logic where I can take an average of bulk of reading on daily basis which were fetched through the sensors mounted on the Robot.
- Then with the help of this data I have plotted linecharts, bubblecharts, and pie chart to give the visual representation of this huge data.
- Worked as a Lead Mendix developer by guiding the Junior developers and helping them to get their results within time

Project - 2 (12 months)

Title : IBX Request Control

Description :

- It is project for keeping transactions records of Data centers, racs by various wild cards such as Expedite, Maintenance, CC install and Shipments.
- Using these wild cards one can categorize the work of DC and one can also filter the data based on the selection of particular or All DC's at a time : Mx Model Reflection , Excel Importer/ Exporter , LDAP Module , Email Integration , Barcode scanning
- Google Analytics integration using Page ID with Mendix application

Project - 3 (6 months)

Title : One PLM Application

Description :

- It was built in Mendix using low code features of it, various App store modules which are integrated with in this application like : Mx Model Reflection , Excel Importer/ Exporter , LDAP Module , Email Integration.
- Also there are some other Modules built like : ECO Request , Common , ECO , ECP , Email Template , Skill Set Matrix

Project - 4 (4 months)

Title : Local IT Transformation

Responsibilities :

- Code integration, development and unit testing.
- Hands-on-experience of creation business flow with the help of Microflows

Project - 5 (4 months)

Title : Claims Database

Responsibilities :

- Code integration, development and unit testing.
- Hands-on-experience of creation business flow with the help of Microflows

Project - 6 (4 months)**Title : Safe LS****Responsibilities :**

- Code integration, development and unit testing.
- Hands-on-experience of creation business flow with the help of Microflows

Project - 7 (5 months)**Title : Credit Collection Tool****Responsibilities :**

- Code integration, development and unit testing.
- Hands-on-experience of creation business flows (i.e. Events) with the help of Microflows , domain model.

Project - 8 (4 months)**Title : Payroll POC****Responsibilities :**

- Code integration, development and unit testing.
- Hands-on-experience of creation business flow with the help of Microflows

Project - 9 (8 months)**Title : Service Now Integration****Responsibilities :**

- Involved in Feature development using Server side scripts, Client side scripting, tables,CMDB,discovery for the logics and functionality development
- Worked on the Web service calls for getting the data for SAP
- Creation of dashboards like graphs

Project - 10 (23 months)**Title : Email Engine****Responsibilities :**

- Code integration, development and unit testing.
- Hands-on-experience of creation business flow with the help of Microflows

Project - 11 (18 months)

Title : Mobile Application

Responsibilities :

- Creating a responsive application
- Sample app development
- Implementation of media queries

Project - 12 (6 months)

Title : IVR Application

Responsibilities :

- Development and unit testing.
- Sample app development

Project - 13 (6 months)

Title : PAN Application

Responsibilities :

- Involved in development and unit testing.
- Hands-on-experience of backend, database configuration and development

Project - 14 (8 months)

Title : Resume Application

Responsibilities :

- Code integration, development and unit testing.

Awards

- Certified Mendix Rapid Developer
- Certified Intermediate Developer
