

**TEK011720** (Development - Front End - 8 + Year)

■ BTech

Highlights

- Hardworking software development professional driven to increase team effectiveness.
- Focused on usability and performance improvements.
- Proven history of developing useful, efficient, and cost-effective projects.
- Team Lead in the company-wide initiative for process improvement.
- Actively involved in the requirement gathering, sprint plannings & deliveries

Skills

Primary Skills

- Angular
- Java Script
- Node JS

Secondary Skills

- CSS
- HTML
- React JS

Other Skills

- UI Developer
- Angular/Vue
- AWS Lambda/Kibana/S3
- JavaScript, Typescript
- Bootstrap, Tailwind

Platforms :

- AWS, Heroku, Digital Ocean
- GIT, Jira, Slack, Asana, Teams, Skype, Trello

Projects

Project - 1 - IT Industry (26 months)

Role : Sr. Software Developer / Solution Architect / Project Manager

Responsibilities :

- Design and document scalable and maintainable software architectures that meet business requirements.
- Evaluate and select appropriate tech nologies, frameworks, and tools for various projects.
- Write clean, efficient, and maintainable code following industry best practices.
- Break down complex projects into manageable tasks and guide the team through their completion.
- Promote and implement continuous integration and continuous deployment (CI/CD) practices.
- Contribute to the creation and maintenance of documentation for development processes, system architecture, and user guides

Project - 2 - IT Industry (24 months)

Role : Sr. Software Engineer / Web Designer

Responsibilities :

- Design, develop, and maintain high-quality software applications.
- Write clean, efficient, and maintainable code following best practices.
- Participate in all phases of the software development lifecycle, including requirements analysis, design, implementation, testing, and deployment.
- Conduct thorough code reviews to ensure adherence to coding standards and to improve code quality.
- Provide technical guidance and mentorship to junior and mid-level developers.
- Represent the development team in meetings, providing technical insights and updates on project status.

Project - 3 - IT Industry (24 months)

Role : Software Engineer / Team Lead

Responsibilities :

- Wrote highly maintainable, solid code for applications that formed the core framework and has won consistent praise from subsequent developers since the initial version
- Lead, mentor, and manage a team of software developers.
- Foster a collaborative and high-performance team environment.
- Conduct regular one-on-one meetings, performance reviews, and career development discussions.
- Collaborate with cross-functional teams, including product managers, designers, and QA engineers.

Project - 4 - IT Industry (24 months)

Role : Jr. Software Engineer

Responsibilities :

- Introduced methodologies and best practices to the software development division to enhance product definition and application customization
- Oversaw new enhancements to existing software systems
- Coded 3-4 Hybrid mobile apps using Ionic and javascript
