

TEK05324 (PLM-Agile - 15 + Year)

■ MCA - Computer Science

Highlights

- a. Oracle-Agile PLM Techno-Functional professional with 13 years of experience on Agile PLM Configuration/Administration, PLM-ERP Integration, Installation and automation.
- b. Key contributor and On-site Lead for multiple end-to-end implementation projects for fortune 500 Companies including Juniper Networks, PMI and Cisco.
- c. Travelled on-site on key milestones to Europe and U.S.A for Requirements, Solution Design and end user training.
- d. Prepare training Collateral and conducted end-user training for Oracle Agile PLM and Oracle Innovation Management for internal use and customers.
- e. Active contribution to Project Planning and Change Control processes during PLM implementations.
- f. Monitor and motivate a 3-8 member project team members to achieve timely deliverables to customers.
- g. Conducted Workshops on Requirement, Process Analysis and end user training on Agile PLM.
- h. Prepare Functional Specification Document (FSD) based on industry best practices.
- i. Conducted IT and Business Training on Agile PLM and Oracle Fusion Cloud solutions.
- j. Active contribution in PC, PPM, PG&C, PCM and PQM modules implementations at fortune 500 companies.
- k. Project lead for multiple M&A and annual SKU Realignment Projects and Infrastructure Upgrades.
- l. Technical Lead for the first global Implementation of Innovation Management solution in 2015.
- m. Specialize in analysis, design and documentation of Agile Customizations/Process Extensions.
- n. Specialized knowledge on Agile 9.x Installation and upgrades on clustered environments.
- o. Exposure to ACP, ACS, LDAP, Data-load and AUT setup.
- p. Received multiple appreciation letters as Individual and for Team contribution for successful completion of PLM projects with Sierra Atlantic, Juniper Networks, Cisco, GE-HealthCare and Life Technologies.
- q. Oracle Certified on Oracle Sales and Pre-sales for Oracle Agile PLM Products

Skills**Primary Skills**

- Administration
- Development
- Functional

Secondary Skills

- Integration

Other Skills

PC, PPM, PG&C, PCM and PQM modules

ACP, ACS, LDAP, Data-load and AUT setup.

Projects**Project-1 Inspirage (Value Chain Consulting) - IT Industry (36 months)**

- a. Onsite at Philip-Morris (Switzerland) for Requirements gathering and process definition on Agile PLM and Configure PG&C module and define security role matrix.

- b. Conduct Internal IT training on Oracle Cloud Innovation Management and Product Development.
- c. Build End-User and Admin Training Material for PC and PPM modules at Compass Minerals.
- d. Conduct internal Chalk-Talk on Innovation Management and PLM to the Global IT Teams.
- e. Prepare Training Materials for various Agile PLM modules for pre-go-live training.
- f. Design and configuration of Agile PC and PPM security and Roles Compass Minerals (CMP)
- g. Conducted On-Site Business and I.T training for Rockline Industries on Agile PC and Admin configuration.
- h. Conducted On-Site Business and I.T training for Compass Minerals on Innovation Management and Agile PPM implementation.
- i. Develop Training Material in PPT format for Agile and Oracle Fusion Cloud PLM Solutions.
- j. Design process extensions/customizations to meet business requirements and automation.
- k. Capture Security Requirements and Attribute and build Security Model for Rockline Industries.
- l. Design custom dashboards and reports on Oracle Fusion Cloud for Innovation Management and Product Development Modules.

Interviewing candidates and help build the PLM practice at Hyderabad

Project-2 Cisco Systems (Networking & Communication) - IT Industry (19 months)

- a. Prepare functional design documents on new enhancements and customizations.
- b. Interact with business owners on new requirements and drive the discussion and analysis.
- c. Work with project manager to prioritize deliverables and prepare release plan.
- d. Monitor Oracle-Agile application stability and availability.
- e. Perform Agile application health check and recommend changes or improvements.
- f. Co-Ordinate with Offshore development/support teams on issue tracking and progress on development activities.
- g. Actively communication to Application owners and higher management on monthly release activities and provide status updates on major production issues.
- h. Perform root-cause analysis on major production issues and suggest improvements to developers.
- i. Co-Ordinated P1/P2 issues with infrastructure, networking and support teams.
- j. Participate in monthly release activities and perform changes.
- k. Capture Business Requirements, review solution design with key stakeholders and document FSD and take final sign-off.
- l. Co-Ordinate with Developers and leads and build PoC on key use-cases.

Project-3 Life Technologies (Life-Sciences) - IT Industry (24 months)

- a. Project Lead for 9.3.1.1 infrastructure upgrade project on Linux for IT on Clustered environment.
- b. Subject matter expert and project lead for Agile PPM used by for NPI by Global R&D.
- c. Manage Change Control Process for Agile Application.
- d. Exposure to annual SKU Realignment and M&A Projects.
- e. Install and Implement Agile PPM for IT on Amazon cloud as proof of concept.
- f. Ensure production system stability/availability and provide 24x7 on-call support.
- g. Advocate industry best practices, methods and processes.
- h. Prepare presentation decks to educate Business Managers/Application stakeholders on new functionality and improvements to Agile Application.
- i. Participate in weekly Business Change Analyst meetings to understand the pulse and priorities of business.
- j. Create new PPM Templates and Roles based on business requirements.
- k. Coordinate with Oracle support on performance and satiability issues in 9224 and apply those Hot Fixes across all Environments.
- l. Perform bi-monthly releases on Agile PC and PPM.
- m. Perform periodic server maintenance and housekeeping activities such as running aVerify, Hot Fixes clearing server logs, etc.

- n. Streamline Agile user account creation and L1/L2 support for Agile application and customizations.
- o. Design/Build customized Cycle-time and Backlog reports using Agile SDK/API on Workflows to improve operational efficiency and eliminate bottlenecks.

Project-4 Valedge Solutions (PLM Consulting Services) - IT Industry (12 months)

As leader in Agile PLM implementations, I worked for several of Valedge key accounts including Apple Inc. several Agile Implementation and upgrade assignments were executed. As a subject matter expert this role involves building a roadmap for Agile PLM upgrades, SDK developments and integration activities to SAP.

Alcatel-Lucent (Data Migration): developed utility using Java that would enable Oracle-Data Load tool to import/migrate Item, Mfg. Part, BOM History and AML History into Agile system. Performed data massaging and validation effort before migration.

Weil-McLain (System Analyst): Prepare upgrade plan, Install Agile 9224 Application Server(Windows), Hot Fixes, Agile Database and viewer on development and production servers. Validate integration between Agile and ERP via SCMnet Adaptor. Perform Agile DB upgrade from 9.0 to 9.2.2.4.

Apple Computers (PX Developer): I was involved in developing complex workflow based validation PX's for Agile PC Module.?

Radisys (Developer & Technical Analyst): Analysis, Design and Development of SDK based Process Extensions (Workflow and Action based).Upgrade from Agile 9221 to 9.2.2.7.

Project-5 Sierra Atlantic (Software Consulting) _ - IT Industry (24 months)

- a. Congregate requirements and prepare design documents for PCM SDK customization as per organizational standards.
- b. Prepare Project Plan along with IT-Program Managers and come-up with timelines for system upgrade.
- c. Provide knowledge transfer and coach Off-shore development team on 10+ new PCM customizations.
- d. Transition Project plan, Functional Test Cases and Technical Design documents to Off-shore development team and set expectations.
- e. Install Agile 9222 Application on lower environments (Solaris).
- f. Install and configuring IFS,DFM and view servers on lower environments (Windows)
- g. Coordinate deployment and testing effort to migrate existing 9.0 customizations to 9.2.2.4.
- h. Perform regression and performance testing using automation tools and publish report results for Business and IT.
- i. Organize and Co-Ordinate CRP regression testing on Agile 9.2.1 along with business users to assess application stability and performance.

Project-6 Sierra Atlantic (Software Consulting) _ - IT Industry (48 months)

- a. Requirement gathering for SCMnet customizations from clients.
- b. Develop PX to automate best industry practices and data validation to minimize integration failures.
- c. Design, Develop and Test SCMnet Inbound plug-in product by using custom BAPI, JCO API and Agile SDK.
- d. Lead development and testing activity on SCMnet-SAP 4.2 Standard product certified with SAP Labs.
- e. Setup multiple Agile 9.0 instances and mount client DB for internal development and testing.
- f. Performed Data Migration& clean-up activities from legacy system to Agile PLM.
- g. Support SCMnet enhancements and issues for clients remotely.

- h. Configure Change Cast and ACS for clients as SCMnet setup.
- i. Migrating Agile 8.5 SDK customizations to 9.0 for clients.
