**Skills****Primary Skills**

- Administration
- Development

**Secondary Skills**

- Migration
- Support

**Other Skills**

- Oracle Agile PLM (9.3.3,9.3.4 and 9.3.6)
- Oracle Cloud PLM
- Putty
- WinSCP
- Oracle SQL Developer
- Eclipse IDE
- Service Now
- Eclipse IDE
- HP ALM

## Projects

### Project 1. Cloud PLM/Agile PLM Developer (27 months)

#### Roles & Responsibilities :

- Work as support as well as Developer role.
- Sketch out the best possible solution and implement for the businesses
- Developed the various type PXs (URL, Event, Custom).
- Developed the groovy script.
- Java Client Configuration.
- Developed SOAP best web services.

### Project 2. Agile PLM Developer (12 months)

#### Roles & Responsibilities :

- Understand the business requirements.
- Developed the various type PXs (URL, Event, Custom).
- Developed the groovy script.
- Java Client Configuration.

### Project 3. Agile PLM Support (6 months)

#### Roles & Responsibilities :

- Support Integration with Oracle EBS
- Configuration changes
- IHUB error analysis and error resolution
- Work on Best Practice of Agile PLM Configuration

### Project 4. Agile PLM Consultant (12 months)

#### Roles & Responsibilities :

- Through OWC collaborate with Oracle to fix the issue.
- Developed many utilities to support my client.
- Provide support in various cloud field like Security Console, Scheduled Processes, Reports and Analytics and Manage Configurations
- Agile Installation and Configuration in Standalone mode.
- Agile Configuration and Propagation and compare the .agl file before moving to any environment
- File manager installation and configuration for many locations.

- Resolving day to day issues of users.

## **Project 5. Agile PLM Consultant (12 months)**

### **Roles & Responsibilities :**

- Worked as a developer for implementing the new configurations and customization for proposed requirements.
- Implemented various pre events to validate business data in workflows.
- Developed interfaces to send data to various systems.
- Agile Installation and Configuration in Standalone mode.
- Resolving day to day issues of users.
- Developed Process Extensions, Events, URL PXs, standalone Jobs, Generating Reports

## **Project 6. Agile PLM Development (10 months)**

### **Roles & Responsibilities :**

- Developed Process Extensions, Batch Jobs and Generating Reports for PC modules.
- Configuring Agile PLM Subclasses and Workflows.
- Agile Installation and Configuration in Standalone mode.
- Configuring ACS to interface downstream systems.

## **Project 7. Agile PLM support and Development (36 months)**

### **Roles & Responsibilities :**

- Worked on requirement gathering, design and development of Agile PLM System.
- Agile Installation and configuration in Standalone mode.
- Configure Agile as per client requirement like Role, Privileges, Workflow, Criteria, Sub- classes, users' profile and etc.
- Implemented various enhancements including process extensions, events and schedule jobs.
