

TEK06311 (PTC - Windchill - 14 + Year)

Highlights

- Have Rich Experience in Product Lifecycle Management (PLM) - in Retail, Footwear, Apparel and Automotive, Aerospace, HealthCare, Electric Vehicle domains and Entrepreneurship experience.
- Worked on Design, Development and Testing of various Implementation, Enhancements and Maintenance Projects.
- Expertise in Business Process Analysis, Lifecycles and Workflows, Configuration, Customization and Integration of PTC's FlexPLM, TradeStone (Bamboo Rose) and Windchill applications with other enterprise systems.
- Exposure of working on different software development methodologies like Waterfall Model, Agile/SCRUM and ITIL.
- Worked on couple of RFP's, Effort Estimation and Project Plan preparation for Trade Stone, FlexPLM and Windchill Projects.
- Excellent communication skills and interacted with clients (US, UK, Europe, China and HK) for supporting them on PLM implementation and post implementation

Skills

Primary Skills

- Configuration Management
- Windchill Customization
- Windchill Upgrade

Secondary Skills

- BOM Management
- Change Management
- Performance Tuning

Other Skills

- PLM (Manufacturing)
- Problem Solving
- Decision Making
- Communication
- Delivery Management
- Team Management
- ITIL

Projects

Project - 1 - Manufacturing Industry

Title : Windchill Enhancements

Responsibilities :

- Requirement analysis and understanding, providing solutions as per business requirements.
- Providing solution approaches and design, development, preparing Technical Specs, Customization and deployment activities

- Coordinate with Business Team, Onsite Team and Testing Team.

Enhancements :

- Product Data Model
- Sync CR and CN
- Revise CR
- Enterprise Data
- Change Task Process Owner Updates

Project - 2 - Manufacturing Industry

Title : Windchill 11 Upgrade

Responsibilities :

- Code upgrade of Windchill 10.2 to make it compatible with Windchill 11.0.
- Analyzing the deprecated API's and finding the replacement API in Windchill 11.0.
- Merging the code changes with the latest build and deploying the code using BIF to the upgrade server.
- Performed unit testing of the functionality on upgraded system.
- Analyzing and fixing issues raised by the QA team.
- Documentation - Upgrade Analysis, BIF Extension Analysis, Smoke Testing, etc.

Project - 3 - Manufacturing Industry

Title : TradeStone Enhancements

Responsibilities :

- Requirement analysis and understanding, developing solutions as per business requirements.
- Preparing Project Plan, Development Plan and Technical Design Document.
- Providing solution approaches, Configuration, Business Rules, Query Configuration, Report Configuration, Integration Mapping and Changes, Unit Testing, fix defects, Migration and deployment checklist & activities related to TradeStone system.
- Coordinate with Business Team, Onsite Team and Testing Team.
- Attending daily calls with Onsite Team, resolving critical issues.

Enhancements:

- Buy Sell Enhancements
- Hard Stops Enhancements
- Domestic Enhancements
- Freight Factor Enhancements

Project - 4 - Manufacturing Industry

Title : Windchill PLM Quality Implementation

Responsibilities :

- Requirement analysis and understanding, developing solutions as per business requirements provided by Product Owners.
- Providing solution approaches and design, development, preparing Technical Specs, Configuration,

- Customization, Unit Testing, Fix defects and deployment activities related to Windchill CAPA Implementation.
- Coordinate with Business Analysts, Solution Architects, Product Owners and Quality Assurance team.
- Attending daily SCRUM meeting with Product owners, publishing the action plans for next day throughout the Sprint.
- Attending Sprint Backlog meetings and Sprint Planning sessions with Product Owners, Solutions Architect and Project Integrator

Enhancements :

- SCAR Module in Windchill.
- CAPA module as per customer requirement and ISO 9001 Guidelines.
- Manage attachments and Owner assignment.

Project - 5 - Manufacturing Industry

Title : FlexPLM Implementation

Responsibilities:

- Requirement Analysis, providing solution approaches, preparing Technical Specs, Configuration, Customization, Unit Testing and preparing User Training Documents.
- Coordinating with Onsite Team, Client and Testing Team on daily basis.
- Provide quality of deliverables to client on time.
- Analysis of critical issues.

Enhancements:

- Enable Source creation and Colorway Sourcing from Line sheet.
- FlexPLM-SAP Integration through web services – Activation of Europe Region Affiliates for 3 Major Brands. – Removing the dependency of the legacy system.
- BOM Productivity Enhancements.
- Loader for Sourcing and Placement.
- Developed prototype for Sample enhancement.

Project - 6 - Manufacturing Industry

Title : FlexPLM Enhancements and Maintenance

Responsibilities:

- Proactively train & coach team members on FlexPLM/Windchill enabling the team to expand their expertise into new technology and also build the expertise for future implementations.
- Design and Development, Gap Analysis, Technical Documentation, Testing, Deployment and Maintenance activities.
- FlexPLM Configuration, FlexPLM Customization, Testing, Bug fixing, Performance Tuning, Deployment, Maintenance and Monitoring activities of FlexPLM Application.
- Closely work with Senior Implementation consultants and Solution Architects to provide quality of deliverables to client.
- Performance tuning and taking the ownership of Critical issues.
- Managing Team members and ensuring 100% process compliance for the project.
- Supporting clients on post implementation challenges, preparing weekly reports and handling client calls on weekly basis.

Project - 7 - Manufacturing Industry

Title : FlexPLM Enhancements

Responsibilities:

- Proactively train & coach team members on FlexPLM/Windchill enabling the team to expand their expertise into new technology and also build the expertise for future implementations.
- Design and Development, Gap Analysis, Technical Documentation, Testing, Deployment and Maintenance activities.
- FlexPLM Configuration, FlexPLM Customization, Testing, Bug fixing, Performance Tuning, Deployment, Maintenance and Monitoring activities of FlexPLM Application.
- Closely work with Senior Implementation consultants and Solution Architects to provide quality of deliverables to client.
- Performance tuning and taking the ownership of Critical issues.
- Managing Team members and ensuring 100% process compliance for the project.
- Supporting clients on post implementation challenges, preparing weekly reports and handling client calls on weekly basis

Awards

- “Darya Ye Noor” Award in recognition of my Exemplary Performance.
- Winner of Fastest Learner Fest – Digital 101 and Design Thinking.
- Prestige of receiving Client Appreciations for quality of deliverables in most of the projects.
- Best Associate of the Year – yearly event (2014)

Certifications :

- PTC Certified PLM professional, ITIL V3 Foundation Certified and Startup India Program Certified Entrepreneur
