

**TEK04077** (Automation Test - 9 + Year)  
■ BTech

## Highlights

---

- 9 years of experience in Automation and Manual Testing in Web Based Application.
- Extensive experience in Automation Testing using Open Source Automation Testing library Selenium Web Driver with Java binding.
- Have hands on experience on developing framework from scratch (Hybrid framework using POM, Data driven and TestNG).
- Good knowledge on Cypress automation tool for both UI and API testing
- Skilled in understanding the Software requirements and project functionality.
- Prepared various types of Testing Documents like Test Scenarios, Test Cases, Defect Reports and Status Reports.
- Experience in executing test cases to test the application functionality against the requirements.
- Experienced in various levels of Software Testing topics like Smoke Testing, Stability testing, Functional testing, Regression testing and Sanity Testing.
- Able to Automate Functional Test Cases by using Selenium Web Driver.
- Have good exposure in Cucumber (Data driven, Parameterization, Tagging, Feature files, Gherkin, Steps function etc.) for writing Smoke and Regression tests.
- Having good knowledge on AWS cloud (Athena, Lambda and Step functions, S3 bucket)
- Experience in Object Repositories, Parameterization, Regular Expressions, File Handling and Query Execution.
- Good knowledge of all the phases of Software Development Life Cycle (SDLC) and Software Test Life Cycle (STLC)
- Worked on Team foundation Server (TFS) and JIRA and ADO.
- Experienced in Agile Testing.
- Knowledge on Rest API testing using Postman, Rest-Assured and Cypress.
- Knowledge of creating UI/Dashboard using Netbeans and integrate the java code.
- Mentoring and giving training to new team members.
- Well versed with the Insurance domains terms and processes.
- Good interpersonal skills, commitment, result oriented, smart working with a quest and zeal to learn new technologies and undertake challenging tasks.

## Skills

### Primary Skills

- API Testing
- REST
- Cypress
- Selenium
- Java

### Secondary Skills

- Functional testing

## Other Skills

- **Defect Tracking Tools** : Jira, ADO and TFS
- **Configuration Tool** : GIT, GIT Hub, Bitbucket, Azure devops
- **Testing Tools** : Selenium Web Driver, Cucumber, Katalon Studio, Postman, Cypress, Rest Assured, API
- **Build Tool** : Maven
- **CI Tool** : Jenkins
- **Scripting** : Java scripting
- **UI Tool** : Netbeans
- **Language** : Java
- **Reports Tool** : TestNG, Allure Reports and Extent Reports

## Projects

---

### Project 1. Claims UK - IT Industry (10 months)

#### Roles & Responsibilities :

- Writing, reviewing, and executing test cases - regression testing, smoke testing and functional & nonfunctional testing.
- Reporting bugs in Jira.
- Collecting Test Data for Data Driven Testing.
- Creating Automation Resources such as Object Repository, Function Libraries.
- Involved to Develop the Automation Framework.
- Preparing and Executing Test Scripts using Selenium-java.
- Automation of pending regression tests from backlog.
- Debugging and Running Tests and Analyzing Test Results.
- Execution and updating of test scripts.
- Monitoring the automation pipelines and gates.
- Prepared the Weekly Status Reports and Daily Status Reports and Involved to Prepare the Test Deliverables
- Attending Client and Internal call on daily basis.
- Working as an Individual contributor by taking responsible of a thread.

#### Tools :

- Selenium-Java, Rest Assured, Cucumber BDD, Azure Devops

### Project 2. AccessCorp - IT Industry (26 months)

#### Roles & Responsibilities :

- Writing, reviewing and executing test cases - regression testing, smoke testing and functional & nonfunctional testing.
- Reporting bugs in ADO.
- Collecting Test Data for Data Driven Testing.
- Creating Automation Resources such as Object Repository, Function Libraries.
- Involved to Develop the Automation Frame Work.
- Preparing and Executing of Test Scripts using Cypress.
- Automation of the Test Scripts for Regression Testing using Cypress.
- Debugging and Running Tests and Analysing Test Results.
- Execution and updating of test scripts.
- Monitoring the automation pipelines and gates
- Prepared the Weekly Status Reports and Daily Status Reports and Involved to Prepare the Test Deliverables
- Attending Client and Internal call on daily basis.
- Working as an Individual contributor by taking responsible of a thread.

**Tools :**

- Selenium-Java, Rest Assured and Cypress for UI and Rest API

**Project 3. TCOE - IT Industry (12 months)****Roles & Responsibilities :**

- Collecting Test Data for Data Driven Testing.
- Creating Automation Resources such as Object Repository, Function Libraries.
- Involved to Develop the Automation Frame Work using TestNG.
- Preparing and Executing of Test Scripts using Selenium Web Driver.
- Automation of the Test Scripts for Regression Testing using Web Driver.
- Debugging and Running Tests and Analysing Test Results.
- Execution and updation of test scripts.
- Prepared the Weekly Status Reports and Daily Status Reports and Involved to Prepare the Test Deliverables.

**Tools and Technologies :**

- Selenium-Java for UI, Rest Assured for Rest API automation, Jira

**Project 4. Annuity Net4 - IT Industry (65 months)****Project Description :**

This is a web application used to sell annuity (insurance) in US market. (<https://www.annuitynetworks.com>)

**Roles & Responsibilities :**

- Writing, executing & reviewing test cases - regression testing, smoke testing and functional & nonfunctional testing.
- Working on Team foundation Server (TFS) to report Bug.
- Collecting Test Data for Data Driven Testing.
- Creating Automation Resources such as Object Repository, Function Libraries.
- Involved to Develop the Automation FrameWork using TestNG.
- Preparing and Executing of Test Scripts using Selenium Web Driver.
- Automation of the Test Scripts for Regression Testing using Web Driver.
- Debugging and Running Tests and Analysing Test Results.
- Execution and updation of test scripts.
- Prepared the Weekly Status Reports and Daily Status Reports and Involved to Prepare the Test Deliverables.

**Tools :**

- Selenium Web Driver, TFS, Jira

## Project 5. Annuity Maintenance Platform (AMP) - IT Industry (65 months)

### Project Description :

This is a web application used to update features in annuities (insurance) in US market.  
(<https://www.annuitynetworks.com>)

### Roles & Responsibilities :

- Writing, executing & reviewing test cases - regression testing, smoke testing and functional & nonfunctional testing.
- Working on Team foundation Server (TFS) to report Bug.
- Analysing Software requirement specifications (SRS) and prepare test case accordingly. Also, Involved in Internal Test Case Review for Other Team Members.
- Effectuating new processes and redefining existing processes. Perform User Acceptance Testing.
- Coordinating with IT and clients for timely completion of the project by arranging meetings as well as documenting the same.

### Tools :

- Team Foundation Server, Selenium Web Driver, SVN

## Awards

---

- Contributed in **Twelve successful Releases** of Annuity Net.
- Awarded as “**Best Employee of the Releases**” in Annuity Net.
- Appreciated and awarded for taking initiatives for event management.
- Got **Spot light award** in current project
