

TEK06970 (SAP - 9 yrs)
 ■ BTech

Highlights

I am a Certified on **SAP HANA & SAP BW4HANA 2.X**, consultant having total **9+ Years** of experience in SAP BW (From 3.X to 7.5 HANA & 2.X HANA) and worked in Development, Implementation, Enhancements, Roll-out, Upgrade, Migration and support projects and having rich experience in handling the projects as a system coordinator and building a good rapport with the customers. I am having vast experience in SAP BW4HANA with strong architect, programming, design skills and proven record of accomplishment of modeling and building large scale SAP BW ON HANA, SAP BW4HANA systems.

Work Experience On Domains /Applications/Tools: Total 9+ Years of experience in SAP

- 8+ Years of experience in SAP BW , SAP BW ON HANA ,BW4HANA , Native Hana , CDS Views.
- 1+ Years Experience in WEBI.
- **Certified in SAP HANA & BW4HANA 2.X**
- Good Knowledge in **SAP SAC ,Native hana, ABAP, SQL, CDS Views, SAP ERP, SLT , MS OFFICE.**
- UC4 Monitoring tool V10, V11

Strengths :

- Organizer & Planner, Team Builder, Confident & Motivated Positive Attitude.
- Computer Proficient, Competitive Excellent Communication, Flexible & Adaptive.

SAP & Organizational skills: SAP Skills: SAP BW (3.X to BW on HANA 7.5)&SAPHANA,Native HANA, ABAP,SQL,SAC, SAP IP,SLT,CDS Views,BODS.

Organizational:

- Ability to generate team spirit in a group and work with harmony.
- Willingness to learn, pick up new skills quickly and challenges.
- Sinceare , Honest , hardworking, straiight forward , practise approach in work.
- Single contact for 500+ Users.

SAP Experience Summary: 9+ Years of SAP Experience

Modeling: Info Areas, Info Objects Catalogs, Info Object, **ADSOs** Composite Providers, Open Hubs, Routines, Calculation Views, CDS Views, Hybrid Modelling, Generic/Customized extractors, Enhancements, Variable Creations, Reports Developments, SAP SAC Models Creations (Live connections, Import Connections.... Etc..).

Extraction: LO Cockpit Extraction, Generic Extraction, Data Source Enhancement, Extraction of data from Flat Files.

Reporting: Restricted key figures, calculated key figures, Variables, Processing Types, Condition reporting, Exception highlighting, Filter, Free Characteristics, Structures, Workbooks and RRI (Report to Report Interface) using BEx Analyzer and Query Designer, Analyses office

ABAP & SQL: Good Knowledge in ABAP & SQL ability to write all routines and understand the code.

Good knowledge in CDS view creations and utilized in BW, SAC, Firoi..etc.

SAC: creating Models bases on the Live connections and Import connections, Planning Data in inside SAC, Forecasting data.... Etc.

Support Activities: Automation Process, Worked on Regular failures, Upgradation activities, and authorization issues and worked on broadcasters, Uc4 Monitoring tool, Migration Topics, BIA improvement, House Keeping activities and other maintenance topics which is required, Absolute Objects...etc.

SAP HANA Modeling: Rich Knowledge in Creation of Information views Like different Attribute views (for Representing Master Data) and Rich Knowledge in Creation of different types of Calculation Views, Good Expertise in **Hybrid models** (BW4HANA objects using in CV or Hana objects using in Bw4HANA), Creation of Input Parameters, Variables and Restricted Columns and Calculated Columns & Creation of **CDS Views** and consumed in SAC and Bw4HANA .

Data Provisioning: Rich Knowledge in Data transferring through Data Services, Good Knowledge in SAP Real-time Data transferring using technique SLT to SAP HANA, Good Expertise in Direct Extractor Connection for transferring BW Data sources Data from ECC to SAP HANA.

Automation Process: I have done the automation for few data loads where regular activity is required to reduce the manual effort and created the programs in the sources systems to fetch the data into setup table and health check system automation process.

Skills

Primary Skills

- BW4HANA
- SAP BW

Secondary Skills

- CONSULTANT

Other Skills

N/A

Projects

Seagate (Digital Transformation Project) (13 months)

Environment: SAP BW4HANA,2.0, SAC, S4HANA, ABAP, SQL Scripts

Responsibilities

- Owner of Material and Customer Master Objects.
- Coordinating with Client for accommodating the changes in requirement.
- Worked on Hybrid Modelling with LSA++ Architecture.
- Created Many Models like Calculation views, ADSO's, CP's and Queries. Used Hana objects inside BW4HANA and BW objects in HANA modelling.
- Created CDS views Data base model extractors.
- Worked on Classification Material Models. almost worked on 70 Material master classification Developments.
- Worked in BADI based enhancements.
- Working on various incidents and issues which is occurring during testing Phase.
- Based on client requirement creating the end-to-end implementations

- Working with SAP on Different kind of issues and implementing notes.
- Used Restricted and Calculated Key Figures, Virtual Key Figures, Formulas, Variables, Replacement path Variables, Customer Exit Variables, User entry Variables in the Query Designer.
- Worked on Creation of Models and stories in SAC.
- As per the Customer requirement we have created the Different Visualization in different settings in order to take the decisions.
- Worked on Housekeeping activities to save the memory in Hana system and worked on all support activities.

Gray hill - BW4 EMBEDDED in S4HANA – BW4HANA, Native Hana & CDS Views Modelling (5 months)

Responsibilities

- Created Attribute, Analytic HANA views and Calculated views which would meet business requirements.
- Development of Dimension CV's and Cube based CV's accordingly to the Business requirements.
- Creating Input parameters and variables for the views accordingly to the specification
- Creating the Restricted Columns and Calculated columns as per the requirement
- Working on the performance tuning of Hana views.
- Created the CDS views based on Business requirements.
- Created the table functions and classes in CDS view to Leverage more functionalities in the CDS views.
- Created the Drill down Reports for detailed information.
- Handling the performance questions raised and making changes in models as per the requirement at backend. Identify and Fixing issues and improvising/optimizing solutions.
- Creating the custom tables and filling through procedures.
- Identify and Fixing issues and improvising/optimizing solutions.
- Using filters for data restrictions and calculating the columns to get required data values.
- Involved in implementing HANA Input parameters to derive complex business KPI's as per the requirement.
- Prepared the Documentations for all Developed Objects

Amara raja Groups, SAP BW4HANA,2.0, SAC, S4HANA, ABAP, SQL Scripts (7 months)

Responsibilities

- Involved in all levels supports, Incidents, maintenance topics and automations, Value add-ons to end users (Customer Delight).
- Coordinating with Client for accommodating the changes in requirement.
- SAP BW 4 HANA Modeling for ADSO and Open ODS, Extraction and loading of data from ERP system.
- Worked on End-to-end implementation based on the Business requirement such like Purchase flow, Sales Flow, Vendor Service level, customer service levels...etc.
- Working on various support activities such like data validations, adhoc loads, process chains maintenance, housekeeping activities, upgradations, KBD's, LLBP's...etc.
- Preparing various documents related to the project.
- Working on various incidents and issues which is occurring during testing Phase.
- Based on client requirement creating the end-to-end implementations
- Working with SAP on Different kind of issues and implementing notes.
- Used Restricted and Calculated Key Figures, Virtual Key Figures, Formulas, Variables, Replacement path Variables, Customer Exit Variables, User entry Variables in the Query Designer.
- Worked on Creation of Models and stories in SAC.
- As per the Customer requirement we have created the Different Visualization in different settings in order to take the decisions.
- Worked on Housekeeping activities to save the memory in Hana system and worked on all support activities.

Automotive Aftermarket (AA) - SAP BWONHANA, 7.5, SAC, SAP Native Hana (24 months)

Responsibilities

- Involved in all levels supports, Incidents, maintenance topics and automations, Value add-ons to end users (Customer Delight).
- Based on requirement created the reports with higher Performance by considering all requirements.
- Participated in all phases of the process including Analysis, Design, and support.
- Coordinating with Client for accommodating the changes in requirement.
- Developing SAP HANA data modeling using Attribute View, Analytic View, and Calculation View.
- SAP BW ON HANA Modeling for ADSO and Open ODS, Extraction and loading of data from ERP system.
- Replication using Data Extraction Transfer Loading (ETL) using SAP Data Services 4.0.
- Using SAP LT Replication server (SLT) done the Data provisioning in to SAP HANA.
- Using Filters for data restriction and calculating the columns to get the require value.
- Creating all BW on HANA object and creating Query report as per the customer requirement.
- Will be able to collect business requirements and define functional & technical specifications.
- Preparing various documents related to the project.

Robert Bosch Engineering and Business Solutions Limited (33 months)

Environment: SAP BW 7.3, 3.X SAP ECC6 BO

Responsibilities

- Monitoring Data load activities and recovered failures in Dev, Quality system as a part of unit testing.
- Involving in solving high-prioritized tickets regarding extractions, performance issues and data load failures.
- Monitoring the UC4 tool to check all loads and programs and reports status.
- Worked on up gradation activities on all source as well BW systems.
- Worked on Broadcasters
- And worked Process chains optimizations which we get regularly. Saved almost 80% of data load time.
- Worked on Developments which needs to stabilize the systems.
- Mainly Worked on problem tickets as well change tickets.
- Enhancing the existing reports as per the new requirement.
- Housekeeping activities like Checking table spaces, PSA/Change log Del BIA monitoring, indexes, DB statistics...etc.
- Worked on up gradation activities for all source systems as well BW systems.
- Worked on routines to optimize the codes.
- Preparing Documents for each and all topics and issues.
- Maintaining the portal sheets.
- Creating new Queries based on the user requirement.
- Worked Query Performance issues.
- System Performance tuning.

Royal Enfield - SAP BW 7.3 SAP ECC6 BO (17 months)

Responsibilities

- Monitoring Data load activities and recovered failures in Dev, Quality system as a part of unit testing.
- Preparing the process documents for each enhancement.
- Involving in solving high-prioritized tickets regarding extractions, performance issues and data load failures.
- Working on process chains to automate the Deleting indexes in Info cubes, Process of info packages, creating indexes, ODS activation, further updating, PSA request deletion and Attribute change run so on.
- Using open hub to export data from BI to External systems (flat file, table, 3rd party tool).
- Involving in Unit testing, Integration testing, Regression testing and User acceptance tests.
- Enhancing the existing reports as per the new requirement.
- Monitoring the daily loads to various data targets in the system.
- Monitoring the process chains based on daily, weekly & monthly.
- Manual loading and rolling up the data into data targets.
- Maintaining the logs for each manual load.

- Creating aggregates to improve the query response.
- Performance tuning of queries using aggregates, indexing of Info cubes.
- Based on the Business requirement created the new reports by using the existing reports by changing the filter conditions and writing the cell definitions, RKF's, CKFs.
- Involved in ERP, BW upgrade/Patch activities.
- Created the PC's based on user information.
- Worked on housekeeping activities such as finding large tables and deletion process based on UD information, indexes...etc.
- Flat file loadings based on UD Request

Sony Ericson - SAP BW 7.0, SAP ECC6, BO WEBI 4.0 (14 months)

Responsibilities

- Designed and developed Web Intelligence reports using best practices.
- Web Intelligence reports were built on a BICs connection where BW queries were created using best optimization practices.
- Provided Web Intelligence and Business Objects Dashboard training to internal employees.
- Worked on validating the canned crystal reports with the end user and customized some of canned reports and created new reports as a part of new user requests.
- Developed, Tested, Promoted and Maintained the WEBI Reports, also had modified the existing reports based on user requirements, also solved any issues/errors encountered.
- Used Restricted and Calculated Key Figures, Virtual Key Figures, Formulas, Variables, Replacement path Variables, Customer Exit Variables, User entry Variables in the Query Designer.
- Modified BW queries in to generate WEBI reports using BI Launch Pad in BO to meet user requirements.
- Developed WEBI reports on SAP Bex Queries using BICS in Web-i Rich client.
- Created monthly and summary reports in WEBI 4.0 for the different domains like Finance, Marketing and HR domains.
