

**TEK07127 (IAM-PAM - 6 yrs)**

BTech

Highlights

Having experience of over 6 years in Web Application and Mobile Applications scanning, Penetration testing and, SQLMap, burpsuitpro, Checkmarx, snyk, Ibm AppScan, Python, CSRFTester, Checkmarx, Sny, HCLAppScan, VAPT Experience developing web applications Skills and willingness to learn the latest technologies. Ability to explore, learn and apply technologies to increase business prospects Quick learner, good at communication & Interpersonal Skills

Skills

Primary Skills

- IBM Appscan

Secondary Skills

- Burp Suite
- MySQL

Other Skills

Key Skills:

- SecurityEngineer/Analyst
- IT Security
- VulnerabilityAssessment
- PenetrationTesting
- Sast application security

Projects

PROJECT1: - Ecommerce Industry

- As a seasoned cybersecurity professional with extensive experience in application security, I specialize in utilizing
- **Industry-leading** tools like Checkmarx, Snyk, and Detectify to provide robust SAST, DAST, and SCA services to my clients. With my expertise, identify and remediate potential security vulnerabilities early in the software development.
- **Having a good working experience into PAM (Privileged Access Management)**

PROJECT2: - IT Industry

- Identifying and testing vulnerabilities and conducting research in the areas of information system and network security.

- Performing scan to identify the security issues in the application with automated tools and false positive elimination through manual analysis.
- Web Application vulnerability assessment and penetration testing using various tools like IBM AppScan, Burpsuite, SQLMap, CSRFTester.
- Performing Web application penetration testing using automated and manual tools.

PROJECT3: - IT Industry

- Identifying and testing vulnerabilities and conducting research in the areas of information system and network security.
- Performing scan to identify the security issues in the application with automated tools and false positive elimination through manual analysis.
- Web Application vulnerability assessment and penetration testing using various tools like IBM AppScan, Burpsuite, SQLMap, CSRFTester.
- Performing Web application penetration testing using automated and manual tools.

Awards

- CompTIA Security+
- Certified Ethical Hacker (CEH)
- AWS Certified Security - Specialty certified application security engineer
