**HITACHI ENERGY - S/4 HANA Migration & Country Rollouts**

Scope: Hitachi Energy is the market leader in delivering a sustainable energy future requires the evolution of a

sustainable, flexible and secure energy system. They are migrating from ECC6.0 to S4 HANA to multiple rollouts.

Role: As an SAP Module Stream Consultant and Hands-On, responsible for the following:

Works closely with Functional Leads, project team members, and integration teams for handover of new User Stories based on the requirements for SAP Module PM and PP for Streams like I2R and Plan 2 Deliver - PL/PM.

Optimize the existing ECC code and perform ATC Checks Analysis including Gap Analysis.

Managed and sync the project documentation, functional specifications, transport management, change management using SOLMAN and Panaya Systems. • Managed and mentor junior resources of Infosys and did peer reviews for the code and Technical documentation.

Designed and Integrated ODATA services for the six interfaces for PM Orders, Operation Confirmations, Consumption of Material using Mulesoft as Middleware and MES as third party system.

Designed various Outbound IDOC Interfaces for Service Order to integrate using Mulesoft as Middleware.

Managed and converted more than 15000 objects for Retrofit to migrate from ECC to S/4 HANA System.

Resolved various defects occurred during migration.
