Projects

Project 1. VLMS (Validation Life science Management System) – in Valgenesis - IT Industry (5 months)

Description: VLMS is an advanced software solution that streamlines and manages the validation processes crucial to industries with stringent regulatory requirements, such as life sciences. The VLMS serves as a comprehensive platform for planning, executing, documenting, and tracking validation activities. It ensures

adherence to regulatory standards, enhances product quality, and maintains impeccable documentation and traceability throughout the validation lifecycle.

Roles & Responsibilities:

Coaching and Mentoring: Guiding the organization level and also for team in adopting Scrum practices and principles. This could include helping them understand the roles, responsibilities, and artifacts of Scrum, as well as assisting in the continuous improvement of their processes.

Facilitating : all Scrum events, including Sprint Planning, Daily Stand-ups, Sprint Reviews, and Sprint Retrospectives. You ensure that these events are conducted effectively, remain time-boxed, and that all relevant team members actively participate.

Conflict Resolution: In any team, conflicts can arise. As a Scrum Master, you help resolve conflicts and promote a harmonious working environment. You may act as a mediator or guide the team in finding effective solutions.

Project 2. Kenzo - IT Industry (48 months)

Description: Kenzo is a renowned French luxury designer and a leading multi-brand, multi-channel retailer. The company specializes in offering a diverse range of women's, men's, and children's apparel and accessories that exemplify luxury and style. With a global presence, Kenzo boasts an extensive network of over 450 retail stores, establishing its prominence in the fashion industry.

Role and Responsibilities:

- Agile Team Involvement: Contributed to an Agile team, actively participating in iterative and collaborative practices.
- Scrum Role: Assumed the role of a Scrum practitioner, engaging in stand-up meetings, sprint planning, reviews, and retrospectives.
- Facilitated Communication: Played a key role in fostering effective communication within the team, ensuring seamless information flow.
- Obstacle Removal: Proactively identified and resolved obstacles, optimizing the team's productivity and progress.
- Agile Principles Adherence: Ensured adherence to Agile principles, aiding in the delivery of value-focused results.
- Customer-Focused Approach: Operated in a dynamic environment with a strong emphasis on customer needs and satisfaction.
- Insights into Methodologies: Gained valuable insights into Agile methodologies and their pivotal role in driving project success.

Project 3. Styloko - IT Industry (59 months)

Description: Styloko is a distinguished fashion shopping website headquartered in London, United Kingdom. It serves as a valuable platform for women seeking to explore a diverse range of fashion offerings. In my capacity as a Manual Testing Engineer, I contributed to the entire product lifecycle.
