

**TEK07327 (Maximo - 7 yrs)**

■ BTech

Highlights

- 7.9 years of experience in Maximo 7.6.2,6.2.5,7.5.0 Oracle Developer 10g, Toad Developer, Oracle WebLogic, SQL Server 2012.
- Great expertise in integrating Maximo with legacy systems and sound knowledge of migrating Maximo data and modifications between environments.
- Self-motivated worker and proactive in taking more responsibilities for learning.
- Good communication and problem-solving skills.

Skills

Primary Skills

- Maximo

Secondary Skills

- Database
- Report

Other Skills

- **Languages** Java, Oracle PL/SQL, SQL, DB2
- **Tools** Maximo 7.6.1,6.2.5,7.5 Oracle WebLogic, JIRA, Subversion (SVN), Team Foundation Server, BMC Remedy Tool, SQL Developer, Oracle developer, Control Center, Toad, Smart IT, IBM Clear Team, IBM Clear Quest.
- **Databases** Microsoft SQL Server 2008/2012 & Oracle 10G, DB2 9.7
- **Operating Systems** Window 8/7/XP
- **Methodologies** Agile-Scrum, Waterfall

Projects

Lead Engineer - Maximo (28 months)

- I am working for a US client on Maximo 7.6.0, involving support and development of various client issues, I have also provided a value add by fixing the bin issue involving hours of manual work.
- I have worked on Maximo 7.6.1.2 for a reputed Swedish Client and was involved in Maximo's upgrade from 7.5.0 to 7.6.1.
- I have converted several MBO and field-level classes to automation scripting.

Maximo Developer (13 months)

- Worked for Maximo 7.5 modeled for Aviation So, including ACM fundamentals and associated applications.
- I have worked on a few attribute-level and object-level Automation Scripts.
- Have worked on different change requests as raised by the client that may include Java code changes,

- Workflow, structured or non-structured database changes, bean changes, UI changes, or XML changes.
- Have worked on DBC creation and their movement across various environments.
- I have worked on IFACE integrations and manipulation of different logics in User Exit classes.
- I have worked on data modulation between Data Centers and Remote Data Centers.
- Have worked on App beans and data beans.
- Working on the development of a new application that must mass export certain Xml's in a single click and should get downloaded to the user locally.
- Implementing Asset Install/Remove as per the customer requirements.

Maximo Developer (15 months)

- I have handled Maximo for one of the most prestigious US-based clients in Accenture, DUKE ENERGY, and worked on the latest version of Maximo i.e., 7.6
- I supported and enhanced Maximo, worked on MBO customizations, and level classes, and suggested the most appropriate business logic for key applications.
- I was a part of the L3 support team and was involved in analyzing high-end critical issues, performance issues, and issues that were impacting business.
- The Maximo implemented here is a utilities-based solution package from IBM.
- I have gained a good knowledge of CU's as related to the utility environment.
- Workflow designing as per customer requirements.
- Created and migrated packages using Migration Manager.

Maximo Developer (36 months)

- I handled Maximo for Micron Technologies Limited (USA) for three years. I also possess good hands-on experience in Oracle Database.
- Resolved performance-related problems and error messages by troubleshooting and resolution.
- Implemented Field Validation and customized MBOs.
- Supported and enhanced Maximo System and assisted with its applications like work order, purchasing, security, resources, space management, inventory, financial, event tracking, configuration, assets, services, planning, and administration.
- Performed necessary deployments in Maximo to enhance the environment's usability.
- Workflow designing as per customer requirements.
- Integrated Maximo with legacy systems.
- Provided technical assistance for testing and verification of data sources and optimal performance.
- Prepared technical documentation such as functional specifications, software requirements, and test cases.
- Assisted in the development and maintenance of PL and SQL codes to implement interfacing with Maximo Applications.
- Suggested modifications to database objects, domains, attributes, and relationships in Maximo.
- Provided technical assistance for the preparation of system designs and Maximo applications.
- Analyzed and resolved production issues.
- Created, updated, and maintained database entries.

Awards

- Received appreciation from my Project Manager, Delivery Manager, and client for outstanding work.
- Won on-the-spot awards.
- Received Certificate from Micron for outstanding performance.
- Outstanding Contribution Award by Ocean Spray for Maximo.
