

**TEK07328 (Maximo - 5 yrs)**

■ BTech

Highlights

- Having **5 Years** of IT experience as a **Software Engineer**.
- Good experience and Knowledge in **Maximo 7.6, PLSQL, Java/J2ee, Python, C# and Unity2D/3D**. Strong hands-on Experience on **Integrating** with External Systems Using **MEA and MIF**.
- Having Good Experience on **SQL**, Creating new Object structures, Publish channels, Invocation channels, External systems, Endpoints, Web Services, Actions, Communication Template and Escalations, Cron tasks, Workflows as per client requirement.
- Having Good Experience on implementation of **REST API calls using JSON Resources and JSON Mapping** applications as per client requirement.
- Having Good Experience on **Automation Scripts**.
- Having Good Experience on Maximo Database configuration, Implementations and **Creating Tables, Indexes, Relationships and Domains**.
- Strong working knowledge in developing **Maximo MBO's, and Maximo UI framework**.
- Having good Knowledge on **Maximo Error and Exception Handling**.
- Having good Knowledge on **Application Designer, security groups and users**.
- Strong hands-on Experience on preparing **UI xml's in Maximo 7.6 applications** as per the client needs.
- Good experience in Maximo Application Development and Deployment using **Web sphere Application server**.
- Having Working Experience Implementation of **EAM**.
- Good working experience for **Development, Implementation and Support projects**.
- Good working experience on **UAT and Production Implementation**.
- Good in analyzing, possesses a unique combination of excellent technical skills and ability to understand client requirements.

Skills

Primary Skills

- Database
- Maximo

Secondary Skills

- Java

Other Skills

- **Application Areas** : Enterprise Asset Management, Enterprise Application
- **Products** : Maximo 7.6, WebSphere 9.0, DB2 and Oracle 12g
- **Languages** : PLSQL, Java/J2EE, XML, Python Scripting, C# and Unity 2D/3D
- **Tools & Utilities** : Maximo EAM, Eclipse, FileZilla,SVN,Putty, Sonar lint, Win SCP, SOAP UI, POSTMAN, SQL Developer, Notepad Plus and Unity Engine
- **Documentation** : Google docs/Excel/PowerPoint
- **Operating System** : Windows 7 and Windows 10

Projects

Project 1. Maximo Implementation for UMC - IT Industry (26 months)

Tools : Maximo 7.6

Database : Oracle

Application server : Websphere 9.0

Role : Team Member as Application Developer

Description :

UMC is a major health care provider in the United States. Currently we are working on Implementation and configuring of Standard Maximo EAM Version 7.6.1.1 for the UMC.

Responsibilities :

- Involved Base configuration of Maximo Asset Management. Involved configuration and customization as per user requirement Provided solutions and analysis for new requirements.
- Implementation of Integrations between the systems. Worked on Automation Script as per user Requirements. Prepared Test case for Unit testing and Regression testing. Supported during SIT and UAT testing phases
- Supporting bugs and Enhancement.
- Supporting Production change Implementation. Resolving Issues as per client requirement.
- Handled various production defects and queries

Project 2. Maximo Integration with SAP, S4 HANA and Ariba systems - IT Industry (34 months)

Tools : Maximo 7.6

Database : DB2

Application server : Websphere 9.0

Role : Team Member as Application Developer

Description :

Globe Telecom is a major provider of [telecommunications](#) services in the [Philippines](#). The company is the largest mobile network operator in the Philippines and one of the largest fixed line, and broadband networks. Currently we are working on Implementation and configuring of Standard Maximo EAM Version 7.6.1.1 for the Globe telecom project.

Responsibilities :

- Involved Base configuration of Maximo Asset Management. Involved configuration and customization as per

- user requirement Provided solutions and analysis for new requirements.
- Implementation of Integrations between the systems. Worked on Automation Script as per user Requirements. Prepared Test case for Unit testing and Regression testing. Supported during SIT and UAT testing phases
- Supporting bugs and Enhancement.
- Supporting Production change Implementation. Resolving Issues as per client requirement.
- Handled various production defects and queries.

Project 3. Automated Route Profitability System(ARPS) - IT Industry (7 months)

Tools : PLSQL, Java/J2EE,JSP, Putty, Filezilla.

Database : Oracle 12.1g

Application server : Web logic 10

Role : Team Member as Supporter and Application Developer

Description :

Singapore Airlines is an airline based in [Singapore](#). It carries people from Singapore to 5 continents in the world. It is a major airline in Southeast Asia. The company was the first airline to operate the [Airbus A380](#). On this application, Our responsibility is to successfully generate the revenue reports on a monthly basis.

Responsibilities :

- Done UI Changes and Database configuration changes as per User Requirement
- Created Java classes and JSP's and PL/SQL Procedures and Functions as per Requirement. Involved in the creation of Tables, Triggers and Indexes.
- Deployment of Application.
- Prepared Test case for Unit testing and Regression testing. Supported during SIT and UAT testing phases Supporting bugs and Enhancement.
- Supporting Production change Implementation. Resolving Issues as per client requirement.
- Handled various production defects and queries.
